2013 Walter Cooperation

It quenches our thirst, it cleanses us, yet more than one in six people worldwide have no access to improved water sources. Water scarcity, contamination of potable water, preventable deaths due to poor water-related sanitation and hygiene... these are some of the challenges facing us today.

2013 has been declared as the UN International Year of Water Cooperation to raise awareness on this precious resource. Water is also the inspiration for this calendar. Let this serve as a reminder to all of us to conserve this elixir of life.
